

Click & Learn

The web is an extremely powerful tool to communicate and access information and will become the best vehicle for delivering individual training and assessments. To help training lessons, WEB-SET created a revolutionary platform called WEB-SET Campus that offers a new learning experience beyond the classroom.

Knowledge Transfer and Education

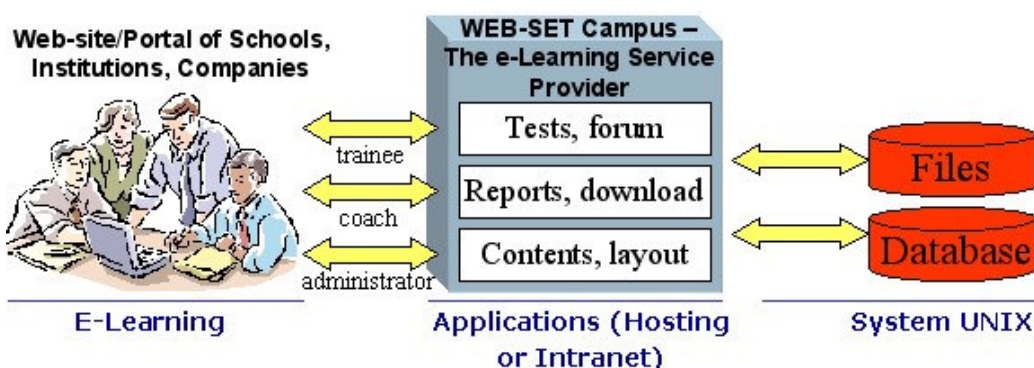

The technology given by WEB-SET provides a unique platform with e-learning tools to support a full range of teaching and learning styles, while making the most intelligent and efficient use of an institution's intellectual and technical resources. It is possible to monitor the results of students and refine the learning experience by analysing the online reporting.

Cost structure efficiencies

WEB-SET Campus is designed to allow coaches to develop and manage course with a very intuitive and user friendly environment. WEB-SET can be easily integrated with your web-site in few minutes, eliminating the need to purchase expensive applications to deliver content and information.

Available Anytime, Anywhere, Anyone

The real power of the web is the information that flows through the network and can be accessed by anyone. WEB-SET offers a wide range of e-learning applications including content management, interactive forum, self tests, surveys and quizzes.

System Overview: Learn anywhere, anytime, anyone...
...and the results achieved are immediately available!
It's that easy!
